

# DAILY CANDY

*Spring 2009 Green Wedding & Event Planning Tips*

## **Keep the Change**

You'll need power behind your party. Check out wind-powered options and offset travel done by out-of-town guests.

## **Minimize Costs**

Cut corners when nobody's looking: The brand new NYC-based [usedeventstuff.com](http://usedeventstuff.com) is like Craigslist for party supplies (lighting, chairs, vases).

## **Help Others**

For good party karma and post-party cleanup, call the Rescue Squad at the Special E to recycle your leftovers, printed materials, and bottles. They'll pick up your centerpieces, candles, and bridesmaid dresses and re-direct them to organizations that help people in need!
