

The Share Package

The face of hunger is no longer just the homeless person on the street. Now it's families that are dealing with economic hardship or are struggling with the devastating aftermath of a tornado, flood, wildfire, or other natural disaster. To put food on the table, they are turning to food banks all across the country. The problem is...these facilities can't keep up with the demand!

In keeping with the mission of our business, we have come up with a unique way to address this critical issue. Each time you plan a meeting or special event, you can purchase a special "**Share Package**" that will feed the same number of hungry children as there are guests at your event. We'll then deliver this care package to a food bank or pantry in the same community where your function is taking place.

Included with each package, we'll also plant the same number of trees as there are tables at your event. This will offset the carbon footprint that's left behind from your program and help provide a greener world for all our children to grow up in.
